SUMMARY

Software developer with 6 years of experience leading healthcare legacy system conversions using React and Redux Toolkit. Currently apprenticing in full-stack development with a focus on AI-assisted engineering workflows, working hands-on with modern AI tooling. Comfortable leading teams, recruiting developers, and keeping code quality high without slowing delivery. Quick to pick up new tools and languages, and effective in both collaborative and independent settings.

SKILLS

- **Languages/Frameworks:** React, Next.js, Redux Toolkit, TypeScript and JavaScript, Node.js, Python, and FastAPI.
- **Frontend:** HTML5, CSS, Tailwind CSS, Webpack, Babel, Yarn, HeroUI, Material UI, and Semantic UI
- **Data/CMS:** MongoDB, Supabase, and WordPress
- **Tools:** Git, GitHub, Bitbucket, Claude API and AI-assisted development

EXPERIENCE

Full-Stack Software Engineering Apprentice, Flatiron School | Apr 2026 - Present

Remote

- Apprenticing in full-stack development with a focus on AI-assisted engineering workflows, working across modern JavaScript frameworks.
- Serving as team lead for a four-person team, owning repo setup and branching strategy.
- Driving architecture decisions and managing task creation and sprint planning.

Web Developer / Front-End Team Lead, BridgeGate / Vorro | Nov 2020 - Dec 2025

Jacksonville, FL

- Led front-end development on a healthcare legacy system conversion, migrating a Java application to a modern, responsive web solution.
- Directed a developer team through two major builds: a 2020 - 2022 project using jQuery, Webpack, and Semantic UI, followed by a 2022 - 2025 rebuild in React and Redux Toolkit.
- Owned the code review process, enforcing quality and coding standards before merges to main.
- Recruited and technically evaluated 9 developer candidates, including React skills assessments, resulting in 2 new hires.
- Fostered a collaborative environment with strong communication between management and engineering teams.

Web Developer, Greyscale Technology | Dec 2019 - Nov 2020

Jacksonville, FL

- Built WordPress websites focused on user experience.
- Resolved client-side issues across multiple concurrent web projects.
- Collaborated directly with clients on updates and enhancements.

RECENT PROJECTS

MixGit mixgit.tech • github.com/HunterCogan/mixgit

An educational platform that introduces version control to beginner coders learning Scratch block-coding. Students upload .sb3 projects, create “remixes” instead of branches, and get AI-powered code feedback from Claude tuned for younger readers.

Built with: Next.js, React, TypeScript, Tailwind CSS, MongoDB, and the Claude API.

AI Interview Prep [Live Site](https://live-site) • github.com/HunterCogan/ai-interview-prep

A mock interview practice tool that generates role-specific questions and scores spoken or typed answers using Claude, with optional account sign-in to track history over time.

Built with: React, TypeScript, FastAPI, Python, Claude API, Supabase, and Tailwind CSS.

EDUCATION

Full Stack Web Development, IronHack

Completed in 2021

Full Stack Development program covering HTML, CSS, JavaScript, React, MongoDB, and Node, with an emphasis on team collaboration and problem-solving fundamentals.
